I have been working in the web industry for the past six years. I'm writing a code according to SOLID, KISS, YAGNI, DRY. I'm publishing all my pet projects on Github as I adore open source. I'm a backend developer, and I fancy creating telegram bots. I began studying to play piano during the lockdown. This CV was created on PHP with Github Actions as I can't live without automation.

Technologies	**PHP:** OOP, SOLID, REST, TDD, PHPDoc, PSR, MVC, Composer, Laravel
	DB: MySQL, PostgreSQL, Redis
	Tests: PHPUnit, Codeception
	Git: unserstand rebase, reflog, squash, cherry-pick, soft/hard reset, etc
	Unix: used ArchLinux, Debian, MacOS, vim, grep, sed, ssh, etc
	Containers: docker, k8s
	Dev environment: nginx/docker, Postman, PHPStorm, xDebug
